Subject: TOMS API Update

Hello All,

I am writing to let you know that we have decided to temporarily disable the TOMS API update feature in SIRAS.

This is because of complexities related to guiding individual accommodations to the specific testing areas.

We are currently working with ETS on a resolution and hopefully we can re-enable the functionality next Fall.

In the meantime, we suggest continuing to use the SIRAS TOMS export presets for CAASPP and ELPAC as before.

We know the data export method already is working well.

Thank you for your patience on this matter.

Kind regards,

Brian
