You may have noticed some new errors were posted to SIRAS. SWDS6677?SWDS6678?
SWDS6687

Explanations and link to help sheet is available on the siras4calpads padlet.

Look at the CALPADS Error Summary document under CALPADS errors.

It is related to initial evaluations done this year where there was no plan being made inactive with a date that is not equal to the meeting date. The result was a SWDS status effective date out of alignment with the initial evaluation meeting date.
