Subject: SIRAS Update 10/1/2024

Hello All,

Tomorrow is Census Day!!

In order to have the best estimated reports and data extract pulled this week, really concentrate on making sure in your SIRAS only students who are enrolled as of Census day are Active in SIRAS. Student enrolled after 10/2 should be pending, students who left prior to 10/2 should be inactive.

Better yet to already have your program settings all updated but minimally get the data as clean as you can this week and make sure to do the "On Fall 1 10/2/2024" tasks as seen in this SIRAS help document https://sirassystems.happyfox.com/kb/article/220

Long story short, export data and run CALPADS style reports this week to have ready to compare to the numbers you will be doing LEA Approve on in your 16. Reports later next month.

In the help document, at the top is a link to the Zoominar Videos, today's office hours was recorded so you can get a better idea of what we are doing this week.

Let us know if you have any questions!

Kind regards,

Brian
