**Subject:** SIRAS Update 12/9/2024 CDE Data Quality Checks

Hello All,

You may have noticed a bunch of new error notifications posted to SIRAS.

These were distributed to your SELPA Directors late last Friday.

Please review these notifications and take appropriate actions as needed.

Here is a SIRAS help sheet page to use for reference.

This is a living document for the moment and if we need to add more notes or resolution examples, they will be posted here in the next day or so.
