**Subject:** SIRAS Update 11/21/2025

Hi All,

- 1. As of today all DRDP ratings should have been transcribed into SIRAS so we can run error/omission reports prior to staff leaving for winter break.**
- 2. As of today all LEAs minimally should have sent all pending records to CALPADS from SIRAS.**
- 3. As of today all LEAs should have resolved all CALPADS errors posted in SIRAS.**

**If your district has been unable to clear all posted errors in SIRAS or send all pending record to CALPADS please schedule time with me directly to help get that resolved.**

**Here is main page on resolving imported CALPADS Errors in SIRAS**

- <https://padlet.com/siras/siras4calpads-9jkiv3u38t33pkj0/wish/pRxDZ4xeV8J3Z183>

**SENR0606**

**If your district has these errors, they typically can now be resolved in two scenarios**

**No plan adoption done at time they entered, do a back in time solution.**

- ***Back in time solution*** <https://sirassystems.happyfox.com/kb/article/499>

**Student arrived and didn't participate, but didn't withdraw, we can exit as cessation of services upon district enrollment date:**

- **See slides 27, 28 here:** <https://padlet.com/siras/siras4spedredesign-n7hsxg7e11hsvarh/wish/jpoxaj0nDAAnZbPE>

**Degree of Support Missing:**

**In August and Sept. At LEA request we batch archived over a thousand of Degree of Support entries that were in current data on the MIS but not archived.**

**As of today I found almost another thousand records across all our SELPA where degree of support had been entered on the MIS page but not archived.**

**I went ahead and batch archived those records with a plan effective date of 9/30/2025**

***NOTE: if staff have entered a degree of support for a record that does NOT need degree of support, those too were archived as of 9/30/2025 and may generate errors.***

***Please DNR the 9/30/2025 archive if a degree of support was erroneously created due to bad data entry.***

**Records that were NOT archived.**

- **Records that had a last IEP date after 10/1/2025**
- **Records that had an open IEP in progress**
- **Records where the last meeting archive DID have Degree of Support, but the meeting outcome was Stay Put!**

**We have done all we can to assist our LEAs in this endeavor.**

**If your district still has missing degree of support notices here are some possible solutions.**

**If most recent IEP prior to 10/1/2025 was stay put, then a plan with degree of support wasn't sent.**

- **Archive the MIS page as of 9/30/2025**

**If the most recent IEP date is on or after 10/1/2025 then there are two solutions.**

- ***Back in time* solution ( <https://sirassystems.happyfox.com/kb/article/499> )**
- **Fix the most recent plan on/before 10/1/2025 in CALPADS to have the degree of support manually added to it.**

**Finding archived transactions for records that have moved away from your district:**

- **If you are requested or need to find an older archive to fix and re-send to CALPADS but the current record has transferred to another district.**
- **Use this help page to find the SSID remotely so you can fix your archived transactions accordingly:**
- **<https://sirassystems.happyfox.com/kb/article/100>**

**If the above does not make sense to you, then of course, feel free to send one SSID to support@sirassystems.com**

**If you have several SSID to 'fix' then please schedule an appointment with me directly at brian@sirassystems.com**

**This update is long enough, ending here.**

**Happy Friday and we hope you have a wonderful Thanksgiving!**
