Subject: SIRAS SIS Integration Update 1/22/2026

Hello All,

SIRAS Export File Update

The 'studentData.csv' file located on your SIRAS secured FTP file will be updated soon.

Two new columns will be added onto the end of the studentData.csv file.

This change will go into effect on 2/2/2026

New Columns Appended:

MediCal Billing Permission, MediCal Billing Permission Date

New Column Data Format:

MediCal Billing Permission - [Y/N]

MediCal Billing Permission Date - [YYYYMMDD]

MediCal Billing information can be found under:

/student info/student profile/[disability/medical] area of SIRAS

<https://sirassystems.happyfox.com/kb/article/69-data-export-special-ed-and-504-data-from-siras-to-sis/>

This does not affect Aeries districts at this time; Unless staff have manually configured Aeries to use the studentData.csv file on their own;

Any district that is importing the SIRAS studentData.csv into their SIS should be prepared to adjust their import routine.

Email support@sirassystems.com with any questions.

Kind regards,

Brian Marcontell
