Subject: SIRAS Update 9/3/2026 - Import Alert

Hi All,

This will most likely not affect the majority of you getting this message.

It is aimed at the few districts that are processing our studentData.csv

If your district uses Aeries or has a custom service file we made specifically for your district.

Then this update won't affect you because you are using the tableB.csv or a service file called something other than:

ServiceData.csv

If you are one of the few districts that are pulling data from serviceData.csv, then here is what you need to know.

Starting next week we will be adding 3 columns to the file.

Provider Code, Location Code and Frequency Code.

Those columns will contain the reportable CALPADS code for the provider, location or frequency data.

That's it, just those three new columns and again that will begin next week.

If you have any questions on this please don't hesitate to reach out and let us know.

Kind regards,

Brian

Brian Marcontell
