Subject: SIRAS Update 10/7/2026 - Census Day

Hi All,

It's Census Day!

A quick reminder: **today is not the deadline to have all errors resolved or all data sent to CALPADS.** The more important deadline is to have your data clean and ready **at least a week before your LEA's projected time to meet with SELPA to review key 16. reports prior to indicating LEA Approve.**

Fall 1 snapshots should become available sometime today or tomorrow. Once they are available, staff can move from monitoring **Data Discrepancies** in CALPADS to reviewing the **Revised Uncertified** snapshots for the actual certification errors and warnings that must be resolved before LEA Approval.

Census Day is also the point-in-time date when you can print or download census data from SIRAS (or another SEDS) for later reference.

My main reason for reaching out today is to remind everyone of **two key Census tasks:**

1. **Complete the Census Day Search and Store.** Ideally, do this today. If you are still completing active-status updates, finish it by Friday.
2. **Continue working through the Local SEDS Audit Checklist** recommended by CDE.

As always, please reach out to support@sirassystems.com if you have any questions about data that isn't being sent or errors/warnings you would like help resolving.

Kind regards,

Brian
