

Generate a list of your students who have SAI in the gen ed setting. Go to the search button. Add criteria of All Services and choose 'SAI' from the menu. Add criteria of Location and choose 'Regular classroom/public day school.' Make sure the query will pull both sets of students by ensuring the dropdown menu says 'And.' Click Search to List.

Go to the Reporting menu to **print a report of the number of students** per school site rather than a list of student names. Choose Statistical Reports and go to the 'Predefined Reports' tab to school service. Utilize the other predefined report options to print a report by other criteria or edit your list using the 'Setup Custom Report' tab. Add fields for your report that meet the need of your search. See example below for searching by Case Manager and click generate report. This will generate a report of the number of students with co-teaching on the IEP by Case Manager.
